

How NN minimises its environmental footprint

At NN Group, our purpose is to help people secure their financial futures. We are committed to doing business in a way that is consistent with our values:

care clear commit

That is why at NN, we avoid – or responsibly manage – any negative impact our business activities may have on people or the environment. In practice, our values guide our approach to issues such as climate change.

Care

This means we respect each other and the world in which we live.

As a financial service provider, our direct environmental impact is limited as we mainly operate in an office environment. Nevertheless, we aim to minimise our footprint by:

- Reducing our use of natural resources
- Identifying and implementing green alternatives
- Compensating our carbon emissions

Our targets and ambitions:

- Reduce CO₂ emission by 15% by 2020, as compared to 2014
- Purchase at least 70% of our electricity from renewable resources
- Remain carbon neutral by offsetting the remainder of our CO₂ emissions
- Support the circular economy through circular purchasing projects

More information

We describe our approach to address environmental impacts in the [NN Group Environmental Statement](#)
For additional information see nn-group.com/in-society

CO₂ emissions

- We are 100% carbon neutral since 2007 and compensate all our CO₂ emissions
- We reduced our CO₂ emissions per FTE by 10.5% in 2017 compared to 2016
- We focus on the usage of materials that could be up-cycled to create a more sustainable workspace

Sustainable business travel

- We encourage colleagues to use public transport
- We increased the number of electric cars in the NN car pool and installed additional charging stations

Sustainable procurement

- Our relationship with our suppliers is based on our values
- We screen our suppliers on social, environmental and financial aspects
